#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 2. Claims 1, 7, 11, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Okuda et al. (JP 06048082 A).

According to the English translation of the abstract, Okuda et al. disclose that at least a part of the magnetic layer 2 of a magnetic recording card 1 is destroyed or removed by a laser device. For example, a plurality of grooves 3 is formed on the magnetic layer 2 of the magnetic recording card 1 by the laser device. As a result, a treating method for disenabling regeneration of the magnetic recording card is obtained wherein many small cutting pieces and many punching pieces are not generated. The examiner notes the following: although the disclosure of Okuda et al. is directed to a method, there must also, necessarily, be some sort of apparatus associated with the method in order to perform the method; regarding the issue of "thermal energy" in

Art Unit: 3723

claims 7 and 17, the examiner respectfully contends that a laser is a form of thermal energy, therefore, the laser of Okuda et al. anticipates the "thermal energy" limitation.

3. Claims 1, 7, 10, 23, and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Constantinou et al. (US 2003/0174616 A1).

Constantinou et al. disclose a compact disc that incorporates a security device for preventing non-authorized reading of the data carried by the disc. Constantinou et al. anticipate the method of destroying or disabling the device by focusing laser energy (also inherently "thermal energy") at a point to cause the first and second layers to separate from each other (see pp. [0031-0034]).

4. Claims 1, 7, 10, 11, 15, 17, 20, and 24-26 are rejected under 35 U.S.C. 102(a) as being anticipated by Feehan et al. (US 2004/0125722 A1).

Feehan et al. disclose both a method and an apparatus for destructing an optical disc, including but not limited to DVD's, the method and apparatus either utilize laser energy focused at a point or thermal energy to cause separation, or destruction of the layers (see paragraph [0059]), and the information or storage device can be rotated on the apparatus.

### Allowable Subject Matter

- 5. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- Claims 21 and 22 are allowed.

Art Unit: 3723

7. The following is a statement of reasons for the indication of allowable subject matter: Regarding the method claim 5, where the device is rotated as the laser energy is applied, it is the examiner's opinion that such has neither been anticipated nor fairly suggested, in part or whole, by the prior art of record. Also, regarding the additional step of treating one or both of the first and second layers in claim 21, it is the examiner's opinion that such has neither been anticipated nor fairly suggested, in part or whole, by the prior art of record.

## Response to Arguments

8. Applicant's arguments with respect to claims 1, 5, 7, 10, 11, 15, 17, and 20-26 have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3723

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to David B. Thomas whose telephone number is (571)

272-4497. The examiner can normally be reached on 7-4 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Joseph J. Hail can be reached on (571) 272-4485. The fax phone number

for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
